Clēar

Keeping you in the clear

PARTY PEOPLE LLC · INITIAL PITCH

1 in 4

undergraduate women experience sexual violence in college.

Staying connected shouldn't become harder when safety matters most.

Source: 2019 Campus Climate Survey, via RAINN (26% of undergraduate women)

THE PROBLEM

Going out isn’t always safe — and it gets worse on big nights

1 in 8

college students experience sexual violence during college

+28%

more rape reports among young women on DI football game days

Concerts? Raves?

Any crowded night out carries the same risk

Sources: 2019 Campus Climate Survey (13% of undergraduates); RAINN, campus sexual violence statistics

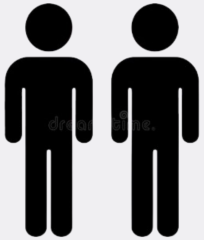

THE QUESTION:

How can students have fun, stay safe, and stick together?

THE SOLUTION:

Clēar

Safety Bands

Paired alerts

Vibrations notify connected friends

One-touch check-ins

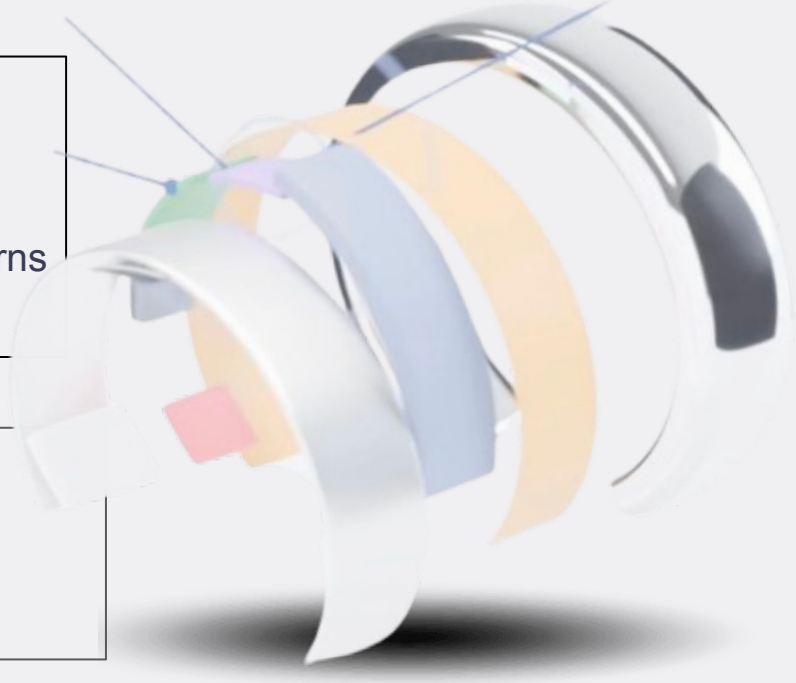

Simple interaction without opening a phone

Motion + heart rate

Sensors intended to identify unusual patterns

Hourly reminders

Prompts friends to reconnect

WHAT OUR CUSTOMERS TOLD US

76%

Have been more intoxicated than they realized

87%

Have someone they trust to look out for them

82%

Interested in receiving an alert regarding a friend's BAC

People already rely on their friends for safety.

Clēar aims to make those check-ins easier and **more proactive**.

Party People survey, October 2026. Question-specific sample sizes: n=90, n=91, n=84. Survey evaluated a wearable BAC-monitoring concept.

Questions?

Appendix : Market

Notes :

19.4 million college students

54.5% Female

25% undergraduate women experience sexual assault

12.5% undergraduate male experience sexual assault

1 in 4 students see sexual assault as a serious problem

18–24-year-olds account for 41% of reported roofie-related sexual assaults

Total Addressable :

19.4 mil college students + 5% parent market (970,000)

19.4 mil + 970,000 = 20.37 million people x 99$ = **$2.02 billion TAM**

Serviceable addressable :

54.5% female : 54.5 % of 19.4 mil = 10.57 million woman

Male = 45.5% of 19.4 million = 8.82 million

12.5% of 8.82 million = 1.1 mil

8.82 mil + 1.1 mil = 9.9 mil student market

4% parent market - 4% of 9.9 mil = 396,000

9.9 mil + 396,000 = 10.2 mil x 99$ = **$1.01 billion**

Serviceable obtainable :

10.57 mil woman x ¼ = 2.6 mil

1.1 mil men x ¼ = 275,000

2.6 mil + 275,000 = 2.87 mil students male / woman

4% of 2.87 mil = 114,800 parent market

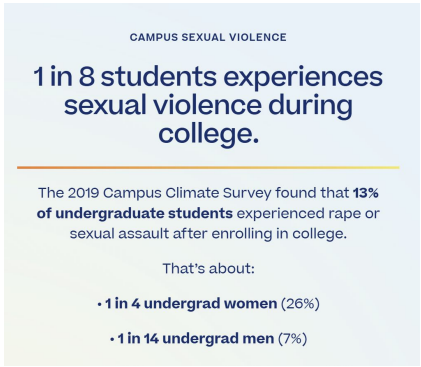

2.87 mil + 114,800 = 2.98 million person market x (99$) = **$295 million**

Appendix - Data

Prevalence in women: 12% of women over the age of 18 in the U.S. reported being raped while incapacitated by drugs or alcohol at some point in their lives.

College campus data: Among U.S. college students, 11% of women and 3% of men reported being sexually assaulted while incapacitated since entering college. [Get the Facts About Drug-Facilitated Sexual Assault - RAINN]

The breakdown? **1 in 3 (32%) undergrad women** and about **1 in 12 (8%) undergrad men** experience rape or sexual assault during four-plus years in college.
[Campus Sexual Violence Statistics | RAINN]

Appendix - Bracelet Parts

- on/off switch
- Built in 60 min timer
- Button to force check in
- Heart rate monitor and accelerometer
  - Emergency notification
- Bluetooth module to connect devices
- Close proximity all clear — keeps buzzing until connection, then reset timer

1. Tracks heart rate
2. Tracks movement
3. Determines if one is in a safe environment

COMPETITORS

Feature	Clēar 	Phone call/text	Fitness wearable (Oura Ring, Whoop) 
Dedicated friend check-ins	✔	Manual	✘
Direct wearable vibration	✔	Phone Notification	Device-dependent
Periodic paired reminders	✔	Requires setup	Varies
Sensor-based prompts	✔	✘	Varies
No required app for use	✔	✘	Varies
Primary purpose	Friend safety	Communication	Health/fitness

How ours differs from theirs

- No subscription apps / app at all (mention dead phones + students)
- Does Not track data college students might not want to track
- Specifially designed fro safety, not wellness
- Special features?

Business model

Competitors: Iphone check-in/dedicated apps, stillOkay

Aura ring/ apple watch

Whoop patents

- Some survey results maybe

Problem Description

- People not being safe when going out
- Separation while going out
- How can you have fun with friends, but also stay together and safe?

The breakdown? **1 in 3 (32%) undergrad women** and about **1 in 12 (8%) undergrad men** experience rape or sexual assault during four-plus years in college.

Campus Sexual Violence Statistics | RAINN

Solution- Alert people of what *might* be happening before it's too late

- our design is tailored towards the safety of friends and others while going out
- Encourages friends to stay by each other's side- safety in numbers
- Monitors heart rate and movement to decide if an individual is safe
- It will then buzz u / a friend
- Have it buzz every hour to check in? Tap feature
- Maybe we can have a visual of the bracelet, and the features to make the slide simple but informational
